DEPARTMENT OF INTERNATIONAL TRADE AND FINANCE

PREPARE FOR THE FUTURE OF GLOBAL TRADE AND FINANCE !

OSTİMTECH Department of International Trade and Finance is dedicated to educating versatile professionals who understand the dynamics of global trade, analyze financial developments and make strategic decisions across international markets.

Delivered entirely in English, the program offers an integrated curriculum combining international economics, business administration, international trade, finance, marketing and logistics. Students strengthen their theoretical knowledge through hands-on coursework, industry collaborations and workplace experience, enabling them to gain valuable insight into the business world while still studying.

With its interdisciplinary educational approach, the program develops students' analytical thinking, problem-solving, teamwork, entrepreneurship and adaptability skills. As a result, graduates are well equipped to pursue diverse career opportunities in both national and international business environments.

DEPARTMENT OF INTERNATIONAL TRADE AND FINANCE

UNDERSTAND THE WORLD, SHAPE THE FUTURE !

OUR MISSION

As the Department of International Trade and Finance, we aim to educate innovative, strategic-thinking, entrepreneurial and experienced international trade and finance professionals who possess a global vision and leadership qualities, based on the foundations of international commercial and economic systems.

OUR VISION

Our vision is to become a globally preferred institution through the quality of education, qualified scientific research and collaborations and our active participation in the development and implementation of economic policies in Türkiye and around the world. We aim to create value for the global community and business world and to become a leading part of this structure.

OUR STUDENTS' ACADEMIC ACHIEVEMENTS

International Trade and Finance Program provides students with a strong academic foundation in economics, business administration, finance, logistics, international trade, and marketing. Through the courses offered within the program, students gain the knowledge and competencies necessary to evaluate the global trade and finance environment from a multidimensional perspective.

The curriculum includes courses such as mathematics, statistics and management information systems to enhance students' analytical thinking, quantitative assessment, and technical skills. In this way, students not only acquire theoretical knowledge but also develop their abilities in data analysis, problem-solving and decision-making.

The program offers advanced elective courses in fields such as international economics and financial institutions, enabling students to deepen their knowledge in areas of personal interest. Case studies, simulations, workshops, conferences and teamwork activities incorporated into the courses enrich the learning process through practical applications and contribute to students' professional development.

PROGRAM COMPETENCIES

Possesses advanced theoretical and up-to-date knowledge in discipline-specific areas such as international trade, finance and logistics, as well as in general business and international business fields including economics, marketing, management and accounting.

Follows, internalizes and applies new knowledge in the field of international trade.

Conducts market research and develops strategies for businesses to enter international markets.

Monitors and applies national and international trade legislation and regulations in the management of international trade activities.

Has the ability to work independently by utilizing the knowledge and skills acquired in the field.

Transfers theoretical knowledge into real-life situations through practical experience gained in areas such as marketing, accounting, foreign trade, finance and logistics.

Possesses the theoretical knowledge and practical skills required to conduct export, import, taxation, regional cooperation and organizations, free zone applications and other international trade activities.

Develops innovative business ideas using entrepreneurial knowledge, transforms these ideas into commercial opportunities and is capable of establishing and managing their own ventures.

Actively participates in decision-making processes in the fields of foreign trade and finance by applying strategic management and analytical thinking skills.

Acts in accordance with ethical principles, environmental awareness and social/global values in all professional activities within the field.

Keeps up with current national and international developments, collects field-related data and communicates effectively with international institutions and organizations through foreign language proficiency.

Gains the professional competencies required to pursue careers in national and international companies, trade organizations, customs, consultancy units and public or private sector fields related to foreign trade.

Approaches challenges in international trade and finance from a broad perspective and considers the views of different stakeholders, prioritizing individual and social benefits while continuously improving this perspective.

CURRICULUM WORKSHOPS

OUR GOALS FOR CONTRIBUTING TO TÜRKİYE AND THE WORLD

To educate qualified graduates who can adapt to global developments and possess strategic and analytical thinking skills.

To produce scientific knowledge in priority areas and share this knowledge with students, the business world and society.

To develop innovative projects, ideas and products that contribute to the development of the country and the region.

To contribute to solving social and economic problems by collaborating with national and international institutions.

To support social, cultural, and sports activities that provide solutions to societal challenges.

To support high value-added production and competitiveness in industry.

To develop educational models through innovative and creative approaches.

To provide scientific and practical contributions to the development of economic and social policies.

AI4UNI

OSTİM Technical University is among the international partners of the **AI4Uni Project**, carried out within the framework of the European Union **Erasmus+ Cooperation Partnerships**, under the leadership of Assistant Professor **Hasibe Aysan**. Coordinated by the **University of Szczecin** in Poland, the project is conducted in collaboration with **Universidad Pablo de Olavide** from Spain, **University of Hradec Králové** from the Czech Republic and **OSTİM Technical University** from Türkiye.

The **AI4Uni Project** aims to support students, academics and administrative staff in using artificial intelligence effectively, critically, ethically and safely. Within the scope of the project, educational content, practical applications and international knowledge-sharing activities are carried out to enhance artificial intelligence literacy.

Through this project, to which our department also contributes, our students have the opportunity to evaluate the applications of artificial intelligence in education, research and the business world from an international perspective; develop the current competencies required by digital transformation; and benefit from the experiences of universities from different countries.

CAREER OPPORTUNITIES FOR GRADUATES

Graduates of the International Trade and Finance Department have a wide range of career opportunities in both the public and private sectors, particularly in foreign trade, finance, banking, logistics, insurance and consultancy. The interdisciplinary structure of the program and its applied education model support students in graduating with the knowledge and skills required to adapt to the needs of various sectors.

Our graduates can pursue careers in the following fields:

- Export, import, foreign trade, finance and international marketing departments of national and international companies
- Foreign operations, treasury, credit, fund and portfolio management departments of banks
- Logistics, transportation, supply chain and customs consultancy companies
- Insurance, factoring, financial leasing and other financial institutions
- Foreign trade and investment consultancy, market research and business development companies
- Organized industrial zones, exporters' associations, chambers of commerce and industry and other professional organizations
- Relevant specialist positions within public institutions such as the Ministry of Trade, Ministry of Treasury and Finance, Ministry of Industry and Technology, Central Bank of the Republic of Türkiye and Capital Markets Board
- Accounting, certified public accountant services and independent consultancy services, provided that the required professional and legal qualifications are fulfilled

Graduates can also develop their own business ideas and establish ventures targeting international markets by leveraging the competencies they have acquired in entrepreneurship, analytical thinking and strategic management.

TESTIMONIALS FROM OUR STUDENTS

Başak Sönmez / 2024 Graduate

OSTİM Technical University provides its students with opportunities to develop themselves both academically and socially. The fact that its expert academic staff always encourages us to strive for excellence and values our ideas demonstrates that I have made the right choice. Through workplace experience (semester-based internship), which starts from the first year of university, we are able to reinforce the knowledge we acquire in our fields while also gaining frequent experience in professional working environments. In addition, the experiences gained through seminars organized on various topics provide us with valuable insights and expertise. Knowing that I will graduate with both comprehensive academic education and professional work experience in my field gives me great confidence.

Dikra Ben Amar Mnissar / 2024 Graduate

I am happy to be one of the students of OSTİM Technical University. The university administration closely addresses the issues faced by students; especially the International Student Office always provides support to students. As a student of the International Trade and Finance Department, I am very satisfied with the educational opportunities offered. The educational process is not limited to courses; numerous seminars are organized on various topics related to our department. Our university also offers an important practice that I have encountered for the first time among universities in Türkiye: workplace training. This practice significantly contributes to our ability to gain a closer understanding of the working environment and develop our awareness of professional life.

Muhammet Emin Dalmış / 2024 Graduate

The main reasons I chose this department were its 100% English-medium education and workplace experience (semester-based internship) opportunities. Our professors have always supported and guided us throughout our education. Besides my courses, I participated in technical teams and departmental seminars organized at our university. I started the workplace experience training, one of the key advantages of our department, in the second semester of my first year and completed my internship at a company in the defense industry sector with the guidance of our professors. I would like to thank our faculty and university for providing us with valuable early career experience.

Bengisu Vural / 2024 Graduate

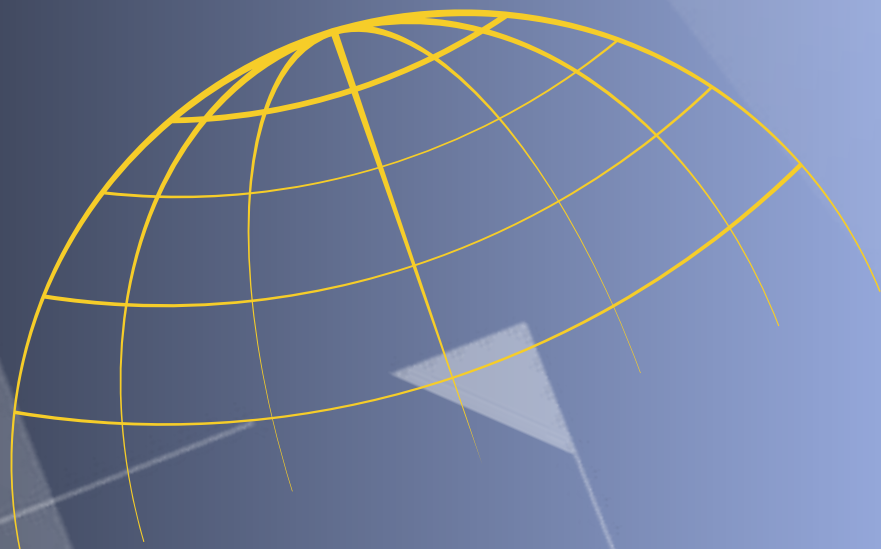

As one of the first students of OSTİM Technical University, I chose the university due to its qualified academic staff and promised education quality despite being newly established. From the beginning of my studies, I realized that I had made the right choice. Through courses taught by expert and supportive professors, I gained academic competence, while workplace experience (semester-based internship) courses starting from my first year provided me with the opportunity to observe different sectors and gain professional experience at an early stage.

INTERNATIONAL APPLICATIONS

The International Trade and Finance Department is a four-year (eight-semester) undergraduate program. Student admissions to the program are carried out by the Assessment, Selection and Placement Center (ÖSYM). For international students, admission is granted after verifying the equivalency of their high school diplomas and confirming that they meet the other requirements specified in higher education legislation, OSTİM Technical University regulations, and other relevant regulations. When necessary, OSTİM Technical University applies its own selection and admission system for international students within the framework of the applicable legislation.

To be admitted to the department, students must meet the following requirements:

1. Completion of all obligations related to tuition fees.
2. There must be no obstacle to obtaining a student visa.
3. Submission of the required documents to the university within the specified period.
